CAREER SUMMARY

Innovative **Full-Stack Developer** with a proven record of turning business challenges into seamless digital products. Skilled in **MERN, Next.js, and TypeScript**, passionate about transforming complex ideas into high-impact digital experiences. I build and optimize high-performance applications like **McDonald's Winnerverse (GCC Campaign Games)**, **Fildex Solutions (Ireland)**, and **MyPrepHero (UAE)** using **Next.js, Node.js, TypeScript, and MongoDB** — focusing on scalability, low latency, and clean architecture that delivers measurable business results.

KEY ACHIEVEMENTS

- Developed **10+ production-grade applications** including **McDonald's Winnerverse, Fildex Solutions, Get Maid App**, and **MyPrepHero**, each delivering measurable business outcomes and system performance gains.
- Built **4 interactive games** for McDonald's GCC campaign — engaging **10K+ users** with zero downtime.
- Designed **scalable full-stack systems** with 99.5% uptime and zero upload limits (Fildex Solutions, Ireland).
- Transformed manual workflows into automated, secure digital experiences across multiple projects.

WORK EXPERIENCE

Remote Freelancer

Software Developer

Remote

Nov 2025 – Present

- Working on **Phase 2 of Fildex Solutions**, expanding functionality and optimizing backend workflows.
- Responsible for enhancing **API architecture, dashboard UI/UX**, and **deployment automation**.
- Delivering scalable, secure, production-grade updates for international clients.

Twinsway Technologies

Software Developer

Trivandrum, Kerala

Oct 2024 - Oct 2025

- Contributing as a **full-stack developer** specializing in **MERN stack, Next.js, and Node.js**.
- Built and deployed scalable **web and mobile applications** for production clients.
- Collaborated with cross-functional teams, integrating modern tooling and CI/CD pipelines.
- Improved feature delivery speed by **30%** through agile iteration and code review culture.

Stackmod Innovations

Software Developer Intern

Trivandrum, Kerala

Feb 2024 - Aug 2024

- Built and deployed **responsive full-stack apps** with MongoDB, React, and Express.
- Engineered secure REST APIs and optimized database performance for real clients.
- Delivered projects independently under tight deadlines, gaining real-world delivery experience.

PROJECTS

Fildex Solutions – Irish Based

Express.js, MongoDB, Hetzner Storage Box

- **Problem:** Manual CV and contact handling slowed recruitment operations.
- **Solution:** Architected a **secure full-stack MERN system** with admin dashboards, file workflows, and automated notifications.
- **Impact:** Achieved **99.5% uptime**, GDPR compliance, unlimited file uploads, and 70% faster admin processing.

Get Maid App – Backend Architecture

Node.js, Express.js, MongoDB, React Native

- Built both **backend APIs** and **admin dashboard frontend** using Next.js + TypeScript.
- Integrated **location-based search**, JWT auth, and real-time notifications.
- Streamlined daily operations — reducing manual coordination time by **80%**.

McDonald's Winnerverse (GCC Region Campaign Games)

JavaScript, Phaser.js

- Designed and developed **4 Phaser.js games** integrated with McDonald's rewards system.
- Created dynamic configurations allowing non-tech teams to update rewards and logic instantly.
- Delivered games that engaged **10K+ users** with flawless performance across browsers and devices.

MyPrepHero – UAE Based

Next.js, Node.js, API Performance Tuning

- Focused on **reducing API latency and improving query efficiency**.
- Refactored Next.js and Node.js backend logic to **boost load speed by 40%** and minimize redundant calls.
- Implemented **API response caching and database indexing**, achieving faster user interactions and higher Lighthouse performance scores.

EDUCATION

Bachelor's Degree in Computer Science

AJ College of Science and Technology, Trivandrum, Kerala

Trivandrum, Kerala

April 2020 - May 2023

TECHNICAL SKILLS

- **Backend Development:** Node.js, Express.js, REST API, EJS, Docker, Prisma
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Frontend Development:** HTML5, CSS3, Bootstrap, Tailwind CSS React.js, Next.js, Phaser.js
- **Languages:** JavaScript, TypeScript, Rust
- **Tools & Practices:** Git, Agile, CI/CD basics, Deployment (Vercel, Docker)

SOFT SKILLS

Strong problem-solving | analytical thinking | Effective communicator | Quick learner | Cross-Functional Collaboration | Time management

COMMUNITY INVOLVEMENT

Active member of **UAE | MENA Software Engineer & QA Community** — collaborating, networking, and contributing to local developer initiatives.
